

WHEEL LOADER

Construction 3 Ton Wheel Loaders

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172463	Wheel Loader	China, exported worldwide

Description

A 3 tonne wheel loader is the smallest class that still does real production work. It suits yard loading, feeding small batching plants, agricultural and grain handling, and site work where a larger loader cannot turn or would damage the surface. Bucket capacity is the specification that decides everything else on a loader, and it follows from the material density rather than the machine size: a bucket sized for sand will be too heavy when filled with wet aggregate. That is why bucket type and capacity are set at order rather than fixed. We build to the buyer's requirement, including against a tender's own technical schedule.

Technical specification

Rated capacity: 3 tonne Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
