

WHEEL LOADER

Construction 4 Ton 2-2.4m3 Wheel Loader

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172464	Wheel Loader	China, exported worldwide

Description

The 4 tonne loader offered with a 2 to 2.4 m³ bucket range. Supplying the size as a range rather than a single figure is deliberate: the correct bucket depends on what the machine will actually carry, and on a loader the limit is tipping load, not bucket volume. A 2.4 m³ bucket filled with light material works well; the same bucket filled with wet aggregate puts the machine over its safe load and slows every cycle as the operator compensates. The bucket is therefore matched to the density of the material at order. Configuration is built to the buyer's specification, including against a tender's own annexure.

Technical specification

Rated capacity: 4 tonne Bucket capacity: 2.4 m³ Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
