

WHEEL LOADER

Construction 4 Ton Wheel Loaders

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172465	Wheel Loader	China, exported worldwide

Description

The 4 tonne wheel loader is the general contracting size: big enough to feed a concrete batching plant or load a tipper efficiently, small enough to work inside a yard and move between sites without special transport. Loaders in this class spend most of their life on one repetitive cycle, so the specification that matters is the one that shortens it. Bucket size, dump height against the truck or hopper being loaded, and tyre choice for the surface all decide cycle time far more than engine power does. Build is to the buyer's own requirement, including against a tender annexure where one is issued.

Technical specification

Rated capacity: 4 tonne Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
