

WHEEL LOADER

Construction 6 Ton 3.3m3 BUCKET Wheel Loader

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172467	Wheel Loader	China, exported worldwide

Description

This is the 6 tonne wheel loader with a 3.3 m³ bucket, a pairing set for aggregate and quarry material of normal density. It is sized so a full bucket stays within the machine's safe tipping load in typical crushed stone rather than only in light material. Where the machine will work in wet or unusually dense material, a smaller bucket keeps cycle times shorter and the machine stable; where it handles light material such as wood chip or coal, a larger one is more productive. The bucket is set against the material at order. Manufacture is to the buyer's specification, including a tender's own annexure.

Technical specification

Rated capacity: 6 tonne Bucket capacity: 3.3 m³ Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender
