

WHEEL LOADER

Construction 6 Ton Wheel Loaders

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172468	Wheel Loader	China, exported worldwide

Description

The 6 tonne wheel loader is a quarry and bulk handling machine. It is specified where the loader is a production unit in its own right rather than a support machine, typically feeding a crusher, loading haul trucks or moving aggregate at volume. At this size the specification questions change. Tipping load, breakout force and cycle time against a fixed truck height decide whether the machine meets the production figure a contract is written around, and those follow from bucket and counterweight choice. Build is to the buyer's requirement, including against a tender schedule where one is issued.

Technical specification

Rated capacity: 6 tonne Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
