

MOTOR GRADER

Construction 130HP Motor Graders

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172472	Motor Grader	China, exported worldwide

Description

A 130 HP motor grader is a road maintenance machine. Its normal work is reshaping gravel roads, cutting and pulling drains, restoring camber and maintaining haul roads, rather than bulk cutting. The specification that matters on a grader is the moldboard and the control system: blade length and thickness against the material, and how precisely the blade can be held to grade over a long pass. A scarifier or rear ripper decides whether the machine can break a compacted surface before reshaping it, which on old gravel roads is most of the job. We build to the buyer's requirement, including against a tender's own technical annexure.

Technical specification

Engine power: 130 HP Build: Manufactured to the specification supplied with the enquiry or tender
