

Product Name :
Feed Pellet Machine

Product Code :
EQMH-CHINA-MY3001049

Description :

Feed Pellet Machine

Technical Specification :

This animal feed pelleter can turn a lot of materials into grains, such as corn, weeds, straw, wood chips, peanut shells, minced meat dog food, etc., so it can be used in chicken farms, pig farms, cattle farms and other farms.

Our millstones have many diameters, and different diameters suit different animals

2mm millstone is suitable for aquaculture animals, such as shrimp, small fish, crabs, young birds

3MM millstone is suitable for aquaculture, young chickens, young ducks, young rabbits, young peacocks, young aquatic products, etc.

4MM millstone is suitable for breeding, chickens, ducks, fish, rabbits, pigeons, peacock birds, etc.

5MM millstone is suitable for breeding pigs, horses, cattle, sheep, dogs and other domestic animals.

Wide range of application

There are many kinds of particles that can be produced

Widen the outlet

It features with simple structure, wide adaptability, and low noise.

The powders do not need or with a little liquid added for granulating pellets, so it is more conducive to storage, due to the pellets moisture is almost same as the materials.

The pellets processed by dry materials are with high hardness, smooth surface, internal curings, so can improve the digestion and absorption of nutrients.

The pellets processing method can kill all kinds of parasitic ovum and other pathogenic microorganisms and reduce all kinds of insect and diseases of the digestive system.

Capacity (KG/H)	Voltage (V)	Power (KW)	Filling water
80-100	110/220/380	3	8%
90-150	110/220/380	4	8%
200-300	380	7.5	8%
400-500	380	15	8%
800-1000	380	22	8%
1000-1500	380	30	8%
