

MOTOR GRADER

Construction 130HP-220HP Motor Grader

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172473	Motor Grader	China, exported worldwide

Description

This entry covers the motor grader across a 130 to 220 HP range rather than at one fixed power. The right power class follows from the work: maintenance grading of existing gravel roads sits at the lower end, new road formation in the middle, and continuous mine haul road duty at the top. Because the range is wide, the specification conversation starts with the application rather than with the machine. Tell us the surface, the tolerance and the hours the machine is expected to work, and the power class, moldboard and wear package follow from that. We manufacture to the buyer's own schedule, including a tender's technical annexure.

Technical specification

Engine power: 130 to 220 HP Build: Manufactured to the specification supplied with the enquiry or tender
