

MOTOR GRADER

Construction 180HP Motor Graders

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172475	Motor Grader	China, exported worldwide

Description

A 180 HP motor grader is specified for heavy formation and for mine haul road maintenance, where the machine works continuously in coarse material and the blade is loaded hard for long passes. Duty of that kind is hard on the circle and the moldboard rather than on the engine, so the wear specification is where the machine is won or lost: circle wear inserts, blade thickness, and cutting edge material all decide what the grader costs to keep working over a year. Build is to the buyer's requirement, including against a tender technical annexure where one is issued.

Technical specification

Engine power: 180 HP Build: Manufactured to the specification supplied with the enquiry or tender
