

ROAD ROLLER

Construction Single Drum Hydraulic Rear Driven 18 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172484	Road Roller	China, exported worldwide

Description

An 18 tonne hydraulic rear driven single drum roller combines heavy compaction with the traction and control that hydrostatic drive gives. It is specified where a contract needs both: thick lifts to compact and gradients or soft haul routes to climb. Hydrostatic drive requires access to hydraulic service support, so it suits fleets with dealer backing rather than fully remote self-maintained operations. Build is to the buyer's schedule.

Technical specification

Operating weight: 18 tonne Configuration: Single drum; Vibratory; Rear driven Build: Manufactured to the specification supplied with the enquiry or tender
