

ROAD ROLLER

Construction Single Drum Hydraulic Rear Driven 20 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172486	Road Roller	China, exported worldwide

Description

At 20 tonnes with hydraulic rear drive, this roller is specified for heavy earthworks on sites where traction is as much of a constraint as compaction: deep fill placed on slopes, quarry platforms and haul road construction. Hydrostatic transmission gives precise speed control at low travel speed, which is what allows consistent pass overlap on a wide platform. The machine is configured and manufactured to the works specification supplied.

Technical specification

Operating weight: 20 tonne Configuration: Single drum; Vibratory; Rear driven Build: Manufactured to the specification supplied with the enquiry or tender
