

ROAD ROLLER

Construction Single Drum Hydraulic Rear Driven 8, 12, 14 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172488	Road Roller	China, exported worldwide

Description

This entry covers the hydraulic rear driven single drum roller at 8, 12 and 14 tonnes. Rear wheel drive through a hydrostatic system gives better gradability than a drum-driven machine, because the tyres grip where a steel drum on loose fill would spin. That makes it the configuration to specify for embankment slopes and haul ramps. Weight class, drum type and cab are set at order against the works.

Technical specification

Operating weight: 8, 12, 14 tonne Configuration: Single drum; Vibratory; Rear driven Build: Manufactured to the specification supplied with the enquiry or tender
