

ROAD ROLLER

Construction Single Drum Mechanical Driven 12 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172489	Road Roller	China, exported worldwide

Description

At 12 tonnes the single drum roller becomes a general earthworks machine, working road subgrade, embankment layers and site platforms at production rate rather than in patches. Compaction is a function of drum weight, amplitude and the number of passes, and the machine has to be matched to the lift thickness specified in the works schedule rather than chosen by weight alone. Mechanical drive is specified where the fleet is owner-maintained. We build to the requirement given.

Technical specification

Operating weight: 12 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
