

ROAD ROLLER

Construction Single Drum Mechanical Driven 14, 16, 18 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172491	Road Roller	China, exported worldwide

Description

This entry covers the mechanical drive single drum roller at 14, 16 and 18 tonnes. Offering the band rather than a single weight is deliberate, because the right machine follows from the works specification rather than from a preference: lift thickness, material and target density together determine the drum weight needed. Once the weight is settled, drum type, amplitude range and cab are configured to the contract and the machine is built to that.

Technical specification

Operating weight: 14, 16, 18 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build: Manufactured to the specification supplied with the enquiry or tender
