

ROAD ROLLER

Construction Single Drum Mechanical Driven 16 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172492	Road Roller	China, exported worldwide

Description

A 16 tonne single drum roller sits in the most widely specified band for highway and airfield earthworks. It carries enough static weight to compact deep lifts of granular fill while remaining practical to move between sections of a linear job. Drive is mechanical, which suits contractors maintaining their own plant at distance from a workshop. Drum configuration, amplitude range and cab are all specified at order against the contract's compaction schedule.

Technical specification

Operating weight: 16 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
