

ROAD ROLLER

Construction Single Drum Mechanical Driven 18Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172493	Road Roller	China, exported worldwide

Description

The 18 tonne single drum roller is a heavy earthworks machine, used where lift thicknesses are generous and the programme is measured in cubic metres compacted per shift rather than in areas finished. At this weight the machine's own mass does much of the work and vibration does the rest, so amplitude selection matters: too much on a thin lift over a hard base simply bounces the drum. Mechanical drive and the full configuration are built to the buyer's schedule.

Technical specification

Operating weight: 18 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
