

ROAD ROLLER

Construction Single Drum Mechanical Driven 22 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172496	Road Roller	China, exported worldwide

Description

This is the 22 tonne mechanical drive single drum roller supplied against the buyer's own specification rather than to a fixed build. Note that a second catalogue record exists at the same weight and drive type; the two should be differentiated by drum configuration or merged. Where a tender fixes the compaction method, the machine is configured to achieve it: drum type, amplitude range, water and wear provision, and cab standard all follow from the works schedule rather than from a model number.

Technical specification

Operating weight: 22 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
