

ROAD ROLLER

Construction Single Drum Mechanical Driven 23 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172498	Road Roller	China, exported worldwide

Description

A 23 tonne single drum roller is the heaviest class routinely specified for earthworks compaction. It is chosen where the works schedule allows thick lifts and the programme depends on covering ground quickly. At this weight, transport becomes a specification question in its own right: axle loading and route restrictions often determine what can actually reach the site. Mechanical drive and the remaining configuration are built to the buyer's own requirement.

Technical specification

Operating weight: 23 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
