

ROAD ROLLER

Construction Single Drum Mechanical Driven 7 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172500	Road Roller	China, exported worldwide

Description

A 7 tonne single drum vibratory roller is the smallest machine in the range that still compacts structural fill rather than just tidying a surface. It suits trench backfill, footpaths, small car parks and the confined parts of a site where a 20 tonne machine cannot turn. Mechanical drive keeps the drivetrain simple enough to repair without specialist support. Drum width, pad-foot or smooth drum, and cab specification are all set against the material being compacted, and we manufacture to the schedule supplied.

Technical specification

Operating weight: 7 tonne Drive type: Mechanical drive Configuration: Single drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
