

ROAD ROLLER

Construction Tandem Drum Full Hydraulic Driven 10 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172503	Road Roller	China, exported worldwide

Description

At 10 tonnes the tandem roller is specified for heavy asphalt duty: motorway surfacing, airfield pavements and thick binder layers where static weight does much of the compaction and vibration finishes it. Machines at this size are usually bought against a paving train rather than alone, so drum width and travel speed have to match the paver's output. Configuration is built to the works specification supplied with the enquiry.

Technical specification

Operating weight: 10 tonne Drive type: Hydraulic drive Configuration: Tandem drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
