

ROAD ROLLER

Construction Tandem Drum Full Hydraulic Driven 8 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172506	Road Roller	China, exported worldwide

Description

An 8 tonne full hydraulic tandem roller covers highway surfacing at full lane width. At this weight the machine compacts binder and base course as well as wearing course, so one roller can follow the paver through the whole layer sequence rather than being swapped out. Hydrostatic drive on both drums gives the controlled acceleration that prevents shoving on a hot mat. Build is to the specification supplied.

Technical specification

Operating weight: 8 tonne Drive type: Hydraulic drive Configuration: Tandem drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
