

ROAD ROLLER

Construction Tandem Drum Mechanical Driven 3 Ton Vibratory Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172508	Road Roller	China, exported worldwide

Description

A 3 tonne tandem drum roller in mechanical drive is a finishing machine for asphalt and thin bound layers. Two smooth drums give a flat, even surface that a single drum roller cannot produce, and at this weight the machine works footpaths, car parks, patching and confined urban sections. Water spray coverage and drum edge condition matter more than weight on asphalt duty, because both determine whether the mat is marked. Build is to the specification stated.

Technical specification

Operating weight: 3 tonne Drive type: Mechanical drive Configuration: Tandem drum; Vibratory Build:
Manufactured to the specification supplied with the enquiry or tender
