

ROAD ROLLER

Construction Three-drum Mechanical Driven Static Road Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172511	Road Roller	China, exported worldwide

Description

A three-drum static roller carries a third drum to increase coverage and kneading action per pass without adding vibration. It is used on granular bases and surface dressing work where the material needs repeated static passes rather than vibratory energy. Mechanical drive keeps the machine simple to maintain. Drum arrangement, ballast and width are configured to the surface being worked and built to the specification supplied.

Technical specification

Drive type: Mechanical drive Configuration: Three drum; Static Build: Manufactured to the specification supplied with the enquiry or tender
