

ROAD ROLLER

Construction Ton Single Drum Frequency and Amplitude Modulation Vibratory Roller

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172512	Road Roller	China, exported worldwide

Description

A single drum vibratory roller with frequency and amplitude modulation, supplied in the weight class the works require. The control system adjusts vibration continuously to the stiffness of the layer under the drum, which prevents the over-compaction that fixed-amplitude machines cause on thin lifts and hard bases. This product name currently reads "Ton" with no figure, so the weight class is not stated in the catalogue and should be corrected. State the weight you need and we build to it.

Technical specification

Configuration: Single drum; Vibratory; Variable frequency and amplitude Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
