

CRANE

Construction 75 Ton Crawler Cranes

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172533	Crane	China, exported worldwide

Description

A 75 tonne crawler crane works on tracks rather than outriggers, which means it can travel with a load suspended and operates on prepared ground without setting up at each position. On a piling job or a long structure that removes most of the standing time a truck crane would incur. The trade-off is transport: a crawler arrives dismantled and is assembled on site. Configuration follows the work programme and is fixed before manufacture.

Technical specification

Rated lifting capacity: 75 tonne Undercarriage: Crawler track Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
