

**CRANE**

# Construction 8 Ton Truck Cranes

| PRODUCT CODE         | CATEGORY | ORIGIN                    |
|----------------------|----------|---------------------------|
| EQMH-CHINA-MY3172536 | Crane    | China, exported worldwide |

## Description

An 8 tonne truck crane is a service and maintenance machine rather than a construction lifting machine. Mounted on a road-going chassis, it drives to the job under its own power and lifts plant, pipe sections, transformers and signage without a separate transport arrangement. Boom length and outrigger spread decide what it can actually lift at radius, which is where most specifications go wrong: a rated capacity is a figure at minimum radius, not at working reach. The crane is configured against the lifts it will actually make.

## Technical specification

Rated lifting capacity: 8 tonne Carrier: Truck mounted Build: Manufactured to the specification supplied with the enquiry or tender

## Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
