

Product Name :
Floating Fish Feed Extruder Plant

Product Code :
EQMH-CHINA-MY3001056

Description :

Floating Fish Feed Extruder Plant

Technical Specification :

Floating fish feed machine is widely used for producing grains into high-grade aquatic feed pellets for fish, catfish, shrimps, crab etc. The feed pellet size can be from 0.9mm to 10mm by changing the moulds. It is suitable for making feed for small fish to big fish.

The cutting structure is very advanced with cutter shaft fixed spring to cut to realize infinitely speed change; the final output product can be cut freely in different length according to requirement.

Novel design, unique, simple structure, easy to install and operate.

The Screw is made of special wear-resisting No38 chromium aluminum molybdenum after tempering, heating and formed, its with wear-resisting and long life.

In order to ensure quality and capacity, there is special pressurization die device. And the electric heating device improves the feed expansion rate.
