

MUNICIPAL AND SPECIAL VEHICLE

Construction 18m Aerial Working Vehicles

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172577	Municipal and Special Vehicle	China, exported worldwide

Description

An 18 metre aerial working vehicle reaches mid-rise building facades, larger signage and high-mast lighting. At this height stability becomes the governing constraint, so outrigger spread and the ground beneath it matter as much as the boom. A machine that cannot deploy its outriggers fully will have its load chart reduced accordingly, which is why the available footprint at typical work sites should be stated with the enquiry.

Technical specification

Working height: 18 m Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
