## Description

A 7 m<sup>3</sup> compactor truck suits small towns and the denser residential parts of a larger collection area, where the route generates more than a 5 m<sup>3</sup> body can hold but the streets will not take a full-size vehicle. The specification that limits it is usually the chassis rather than the body: permitted axle load and turning circle decide what can work the route. Build is to the requirement supplied.

## Technical specification

Body volume: 7 m<sup>3</sup> Configuration: Compaction body Build: Manufactured to the specification supplied with the enquiry or tender
