

Product Name :
Fish Food Equipment

Product Code :
EQMH-CHINA-MY3001069

Description :

Fish Food Equipment

Technical Specification :

The molding process is applicable to all kinds of floating aquatic feed.

The product particles forming uniform stability.

It can achieve precise control of water, steam and feed collocation PLC system.

The wearing parts are made of abrasion resistant alloy steel by special processing technology, the service life is 5 times more than ordinary materials.

The feeding device adopts a variable pitch screw, no knot arch, homogeneity.

The feeder is driven by the inverter, easy to adjust the volume of feed.

Please use the imported with oil lubrication system and oil cooling system, the service life of the bearing is increased by 3-5 times.

Controller

PLC & Touch Screen controls whole line, not one or two equipment

Protector

3 kinds of protector: overload, overcurrent and overheat. Control cabinet is 24V safe voltage

Materials

Cover body, mesh belt and parts touching with products are made by stainless steel 304
