

Product Name :
Fish Feed Pellet Machine

Product Code :
EQMH-CHINA-MY3001080

Description :

Fish Feed Pellet Machine

Technical Specification :

The Floating-Feed Pellet Machine can make many kinds of fodder for different kinds of animal fodder. It can make poultry-fodder, pet-fodder, as well as aquaculture-fodder and fishery feed, which is also called floating –feed.

It is apply to the pretreatment of the animal fodder, so as to reduce loss of nutrition, advance the protein content so the fodder will be digested easier by animals. The poultry-fodder can feed chicken, rabbit, sheep, pig, horse, cattles and so on The pet-fodder can feed dogs, cats, goldfish etc.

The Fishery-feed can feed the fish, shrimps, crab, eel, cat, fish, batrachians and so on.

Screw thread cutter is the most important accessory of fish feed machine. screw thread sleeve and other accessories are all self-produced and sold.

We have rich experience in technical parameters, after-sales guarantee, and update more convenient and efficient.

Choose the engine according to the country's maximum power consumption limit, or you can choose to use a converter, Maximum output of diesel engine 350-400kg/h.

Regarding fish feed formulas, after purchasing our machine, we will provide fish feed formulas with more than 10 years of breeding experience for reference according to the type of fish you need to cultivate.

The fish feed machine can be used to make pet feed at the same time.

Follow the instructions and change the abrasives. Of course, if you are mainly used to make pet feed, we will recommend you to use a Wet type fish feed machine.

The output is relatively large and the maturation process is more Mature, suitable for pet digestive system.

Screw diameter (mm)	Capacity (t/h)	Engine power (kw)	Feeding power (kw)	Cutting power (kw)	Machine size (cm)
40	0.03-0.04	5.5	0.4	0.4	140*103*120
50	0.06-0.08	11	0.4	0.4	147*110*125
