

Product Name :
Aquarium Fish Food Extruder

Product Code :
EQMH-CHINA-MY3001004

Description :

Aquarium Fish Food Extruder

Technical Specification :

Micro-Pellet Precision - Produces 1.0-10.0mm uniform pellets for all aquarium species
Adjustable Buoyancy - Control floating time from 10 seconds to 1 hour
Nutrient Lock Technology - Low-temperature extrusion preserves proteins & vitamins
Multi-Formulation Capability - Handles fishmeal, spirulina, krill, and plant proteins
Hygienic 316L Stainless Steel - Corrosion-resistant, meets food-grade standards
Smart PLC Control - Touchscreen interface with 50+ recipe memory

Precision Feeding System
Micro-ingredient doser ($\pm 0.5\%$ accuracy)
Liquid additive injection pump

Superfine Grinding Unit
Cryogenic grinding chamber (-20°C option)
100-400 mesh adjustable fineness

Twin-Screw Extrusion Core
Special micro-die assembly (0.1-5mm)
Variable shear force control

Gentle Drying Section
Three-stage fluidized bed dryer

UV sterilization tunnel

Nutrient Enhancement
Vacuum flavor coating system
Probiotic spray attachment

Quality Assurance
Laser pellet inspection system
Automated weight sorting.

Installed capacity(kw)	70	105
Real power(kw/h)	50	75
Output(kg/h)	100-150	200-250
