

AUTOMATIC SPREADER MACHINES

Automatic Spreader

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3177001	Automatic Spreader Machines	China, exported worldwide

Description

Being international advanced technology adopted, this equipment is developed independently. It is used to make linen, such as quilt cover and sheet, smooth and transfer them to ironing machine. It is well received by hotels, restaurants, hospitals, railway stations as well as washing plants in large communities and other units.

Technical specification

Ten inches' color touch screen programmable computer control adopted. Each station has statistical function, which can accurately meter feeding number that is convenient for management.
High efficiency and less labor costs thanks to multistation
Linen can be spread and fed evenly because of function of smoothing and air absorbing
No need to move the machine for small fabric because the output table can stretch out and draw back automatically.
Driven by servo motor, the transfer arms take and spread linen at the feeding position
Max width: mm 2800 3000 3300
speed: m/min 4-68 4-68 4-68
Max air consumption: L/min 100 100 100
Rated power: V/p/Hz 4.3 4.3 4.3
