

Product Name :
Dog Food Extrusion Machine

Product Code :
EQMH-CHINA-MY3002036

Description :

Dog Food Extrusion Machine

Technical Specification :

Design:Developed by 3D software, analog simulation, and it has been tested by a computer automatically, in order to ensure the accuracy of the design requirements.

Concept:Modular function, humanized menu system, various applications are always our pursuit. double screw extruder for advanced design concepts can meet different requirements.

Profession:We have a professional and manufacturing industry to ensure the precision and coordination of each component of the extruder, while maintaining stable processing and low noise.

Precision:Precise food manufacturing technology and material selection that ensure cable life is superior to extruder products, to minimize screw and barrel wear.

Experience:More than twenty years of experience in domestic and international advanced double screw extruder. We produce various kinds of food extrusion, such as vegetable protein, cereal flakes / breakfast cereals, pellets, feed / animal feed, etc., enough to solve the problems met during production.

Power	95KW	120KW	140KW	180kw	230kw	280kw
Output	100-160kg/h	200-260kg/h	500-600kg/h	1-2t/h	2-3t/h	4-6t/h
