

**Product Name :**  
Fish Feed Pellet Production Line

**Product Code :**  
EQMH-CHINA-MY3001008

**Description :**

Fish Feed Pellet Production Line

**Technical Specification :**

Type: Floating/Sinking/Slow-Sinking Pellets

Capacity: 100kg–5T/hour (Customizable)

Pellet Size: 0.5–10mm (Adjustable)

Power: 15–160kW (Model-Dependent)

Key Features:

High extrusion efficiency (90–130°C)

PLC control for precision

Corrosion-resistant (Stainless Steel)

Low energy consumption (-20–30% vs. standard)

Key Components of Fish Feed Pellet Production Line :

Pre-processing System:

Hammer mill for raw material grinding

Precision mixer for homogeneous blending

Extrusion System:

Twin-screw extruder with temperature control (90-130°C)

Adjustable die for pellet sizing (0.5-10mm)

Post-processing Units:

Multi-layer dryer with temperature regulation

---

Oil coating system for nutrient enhancement  
Automated packaging machine
