

**Product Name :**  
Automatic Dog Food Machine

**Product Code :**  
EQMH-CHINA-MY3002001

### **Description :**

Automatic Dog Food Machine

### **Technical Specification :**

Fully Automated – Reduces labor with seamless mixing, extrusion, and cutting.

Adjustable Settings – Controls pellet size, texture, and hardness.

Hygienic & Durable – Made from food-grade stainless steel for safety.

Energy-Efficient – Low power consumption with high output.

Easy Maintenance – User-friendly design for quick cleaning.

Automatic Dog Food Machine – Efficient Pet Food Production

The Automatic Dog Food Machine is a high-performance system designed to produce nutritious, customized pet food pellets.

It processes raw ingredients like meat, grains, and vitamins into uniform kibble in various shapes and sizes.

Automatic Dog Food machine

Automatic Dog Food Machine: Components and Applications?

Feeding Hopper – Stores and feeds raw materials (meat, grains, vitamins) into the system.

Mixing Chamber – Blends ingredients evenly for balanced nutrition.

Extruder & Die – Cooks and shapes dough into kibble via high-pressure extrusion.

Cutting Unit – Adjustable blades cut extruded kibble into uniform sizes.

Drying/Cooling System – Reduces moisture for crisp texture and longer shelf life.

Control Panel – Touchscreen interface to adjust speed, temperature, and pellet size.

Optional Add-ons – Flavor coater, oil sprayer, or packaging conveyor.

Install Power	Real Power	Capacity
70KW	50KW	150kg/h
110KW	80KW	250-300kg/h
200KW	160KW	500-600kg/h
220KW	155KW	1000-1500kg/h
Steam:500kg/hour	Steam:400kg/hour	
280KW	195KW	2000-2500kg/h
