

**Product Name :**  
Full Fish Feed Processing Plant Line

**Product Code :**  
EQMH-CHINA-MY3001010

**Description :**

Full Fish Feed Processing Plant Line

**Technical Specification :**

- High Efficiency – Fully automated for continuous large-scale production.
- Customizable Formulations – Adjustable for different fish species.
- Nutrient Retention – Extrusion cooking preserves proteins and vitamins.
- Durability & Low Maintenance – Robust equipment designed for long-term operation.

**Key Components of the Fish Feed Processing Line:**

- Grinding System – Raw materials (such as fishmeal, soybean meal, grains, and additives) are finely ground to ensure uniformity and improve pellet quality.
- Mixing System – A high-precision mixer blends all ingredients homogeneously, ensuring balanced nutrition in every pellet.
- Extrusion System – The core of the production line, where the mixture is cooked, sterilized, and shaped into pellets using a fish feed extruder. Adjustable parameters allow for floating or sinking feed production.
- Drying & Cooling System – Reduces moisture content and cools down the pellets for longer shelf life and stable texture.
- Oil Coating & Flavoring System – Enhances palatability and nutritional value by adding fish oil, vitamins, or attractants.
- Pellets Screening & Grading – Removes fines and ensures uniform pellet size for consistent quality.

Installed power	60 kW	90 kW	120 kW	96 kW	180 kW
-----------------	-------	-------	--------	-------	--------

---

Real power	40 kW	50 kW	100 kW	80 kW	120 kW
Ability	100-150 k g /h	200-250 kg /h	400-500 kg /h	800-1200kg /h	1500-2000 kg /h
