

CONCRETE PIPE MAKING MACHINE

Vertical Concrete Pipe Making Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3292003	Concrete Pipe Making Machine	China, exported worldwide

Description

Vertical Concrete Pipe Making Machine

Technical specification

The operation is simple and convenient, electro-hydraulic control is selected, and the operation control panel can be operated to complete various mechanical actions.

Reliable transmission, electrical appliances, hydraulic pressure and various driving organizations can put the transmission in place, so that the entire pipe-making operation procedure can be completed smoothly.

The mechanical noise is low. After testing by the testing part, the maximum noise during mechanical operation is below 75 decibels, which is lower than the noise produced by the centrifuge.

High production efficiency and low labor intensity. During the production of any diameter pipe of $\Phi 300-1200$, one can be completed in only 2-5 minutes. All demoulding methods are adopted, and the assembly and disassembly of molds are simple, which reduces the labor intensity of workers.

Mechanical system
Mainframe, feeding system, power head system,
Socket mechanism, mold and accessories composition
Pneumatic system
Pneumatic pipeline, positioning cylinder

Hydraulic system
Double hydraulic station, hydraulic cylinder,
Hydraulic valve, cooling water tank
Electrical system

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
