

CONCRETE PIPE MAKING MACHINE

Electric Pole

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3292005	Concrete Pipe Making Machine	China, exported worldwide

Description

Electric Pole

Technical specification

Aggregate:stones used in the production of cement poles, and stones used in most of the 12# stones must be clean and uniform in size.

Sand are the key to the quality assurance of cement poles. It is required that sand can not contain earth and must be clean.

The requirements for cement and cement are 4,25 high-strength cement, and the concrete strength is above c50.

The strength of steel bars and concrete telephone poles depends on the strength of the steel bars. The national standard steel bar is required to have a strength of more than 1570.

The ratio of sand, stone, and cement, according to the standard c50 intensity ratio.

Curing:

High-pressure steam curing is one of the most commonly used cement curing methods. It accelerates the hardening rate of cement, improves the turnover rate of steel molds, and shortens the production cycle.
