

CONCRETE BLOCK MAKING PRODUCTION LINE

Concrete Hollow Block Making Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3294006	Concrete Block Making Production Line	China, exported worldwide

Description

Concrete Hollow Block Making Machine

Technical specification

The concrete hollow block making machine is a gantry-type steel structure special brick making machine. The pressurization method is a downward movement type. It can press various square bricks, slope protection bricks, square bricks and other square bricks with a side length of 400mm or less and a thickness of 100mm or less. Multi-products, etc. It has the advantages of compact structure, strong pressing force, strong rigidity, fully sealed dustproof, circulating lubrication, simple operation, high output, and durability. The feeding mechanism variable speed, rotary table rotation and other parts adopt foreign advanced technology. It has the advantages of large power, stable operation, accurate in place, and low maintenance rate. The use of this equipment not only guarantees more advantages in the production of finished bricks, but also pays attention to the raw materials produced. It uses construction waste and cinder, etc.

Pallet size: 1100×670?

Vibration type: Frequency, amplitude

Excitation frequency: 0?65HZ

Power: 42.15 kW
