

Product Name :
Nik Naks Extruder

Product Code :
EQMH-CHINA-MY3003025

Description :

Nik Naks Extruder

Technical Specification :

Cheetos sticks/Nik naks are special extruded snacks with crunchy and great taste.They are made by a special extrusion processing.

The corn grits are moisturized in the flour mixer with water and fed to the Rotary Head Extruder.

By adjusting the raw materials, temperature and pressure etc.

Due to the two rotary plates,corn grits are squeezed and twisted to curls shapes.

The cutting knives can cut into required lengths.

The Kurkure/Cheetos can be fried in cooking oil or toasted in oven and then cooled before flavoring.

Seasoning is sprayed on the surface to achieve different favorable taste.

Raw materials(kurkure making machine): rice/wheat/corn or other grains powder.

Voltage(kurkure making machine) : Three phases: 380V/50Hz, Single phase: 220V/50Hz. we can make it according to customers' Local voltage according to different countries

Capacity: 100--200kg/h(Corn stick kurkure puff extruder to make Cheetos Nik Nak snack food)
