

FISH PROCESSING EQUIPMENT

Injection Machine for Fish Fillets

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3311009	Fish Processing Equipment	China, exported worldwide

Description

Injection Machine for Fish Fillets

Technical specification

The machine is designed for automatic introduction of salting solution (brine), and if necessary, various additives, in fillets.

The machine is manufactured in accordance with the norms of the Food Safety Management System (FSMS), which meets the highest hygiene standards.

The machine allows you to receive a product that is ready for consumer packaging and feeding it to the counter after a technologically prescribed exposure.

Increasing the weight of red fish up to 16% on a standard brine, without the use of thickeners.

Frequency control of all parameters: conveyor speed, pump productivity, brine injection frequency (the needle lowering cycle is synchronized with the conveyor speed).
