

ICE CREAM MACHINE

Ice Making Machines for Granulated Ice

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3017009	Ice Cream Machine	China, exported worldwide

Description

They produce high-quality granular ice (ice slush type) with the size of pieces of 5 ... 10 mm and a temperature from 00C to minus 0.5oC. Water fraction – up to 20%.

Water for making ice is fed into the freezing cylinder, the surface of which is cooled by a coolant. Ready ice in the form of granules is squeezed out of the cylinder by a spiral screw and transported to the outlet.

Technical specification

Ice machine Lining of machines from stainless steel.

Each machine is equipped with a microprocessor that controls the process of producing ice. If a malfunction occurs, the equipment is turned off and a warning appears on the control panel. The refrigerant used is R 134 a. Ice machines are supplied with both air and water cooling.
