

Product Name :
Twin Screw Puffed Corn Snack Food Extruder

Product Code :
EQMH-CHINA-MY3003052

Description :

Twin Screw Puffed Corn Snack Food Extruder

Technical Specification :

Higher Production Capacity: Twin-screw extruders have a higher production capacity compared to single-screw extruders.

This means that they can produce a higher amount of puffed corn snack food in a shorter period.

Versatility: Twin-screw extruders have the ability to process a wide range of raw materials.

They are capable of processing various types of grains, pulses, and other ingredients to create different puffed corn snack food products.

Improved Quality: Twin-screw extrusion technology minimizes the negative impact on nutritional value, as well as the sensory quality of the product.

The texture and taste of the puffed corn snack food are improved through twin-screw extrusion process.
