

**Product Name :**  
Pasta Making Machine Video

**Product Code :**  
EQMH-CHINA-MY3004016

**Description :**

Pasta Making Machine Video

**Technical Specification :**

Commercial pasta macaroni making machine description:

This Macaroni and pasta food making machine is developed on single rotating screw technology, it contains extrusion system, transmission system, feeding material system, roll cutting system and control system.

The frequency of electrical motor is adjustable with transducer.

The main functions of extruder are extrusion.

This automatic extruder is easy to operate and with solid performance for long term.

By changing mould, it can produce many kinds of pasta.

The macaroni making machine has the advantage of rational design, high automatic degree and accuracy control.

The main body material is stainless steel, which is easy to be cleaned.

The screws material is 38CrMnAl, which is wear-resisting.

Our project is turn-key. We will send our engineer to your factory, install and debug the equipments, and train your operators.

The temperature and rotating speed can be controlled and adjusted.

Power	Capacity
130kw	100-120kg/h
230kw	250-300kg/h
