

Product Name :
Instant Noodle Machinery

Product Code :
EQMH-CHINA-MY3004025

Description :

Instant Noodle Machinery

Technical Specification :

Automatic instant noodle processing line,with perfect technology,compact structure,original design and stable performance,is developed on the base of like produces and requirements in the world market,it realizes high automation ,convenient operation,low energy and small floor space ,that assures all working procedures from feeding flour to finished products can be accomplished once.

The investment for this line is only one tenth of that large size equipment,especially suitable to small-size or self-owned enterprises,the corrugated instant noodle produced by this line tenacious,smooth and transparent,it is very easy to be saturated by water.

High quality Mini fried instant noodle making machine with perfect technology, compact structure, original design and stable performance, is developed on the basis of advanced products and requirements in the world market.

The Mini fried instant noodle making machine realizes high automation, convenient operation, low energy and small floor space, which assures all working procedures from feeding flour to finished products can be accomplished once.

The investment on the Mini fried chips making machine is only one tenth of that larger size equipment, especially suitable to small-size or self-owned enterprises.
