

Product Name :
Industrial Pasta Manufacturing Machine

Product Code :
EQMH-CHINA-MY3004027

Description :

Industrial Pasta Manufacturing Machine

Technical Specification :

The pasta macaroni making machinery adopts hard wheat flour or corn starch as main material to produce a variety of second-extruded food in different shapes which are popular in the market, such as crispy pea, shell, screw, square tube, round tube, wave etc.

It is characterized by unique technics, rational configuration and stable performance.

The macaroni machine can finish ripening , extruding and shaping in one step without boiler.

The products look like glittering, translucent smooth and beautiful and taste delicious after cooking.

Install Power	110KW	190KW	300KW
Consumption power	77KW	130KW	210KW
Output	150KG/H	300KG/H	400KG/H
