

Product Name :
Textured Soy Protein Extruder Machine

Product Code :
EQMH-CHINA-MY3005013

Description :

Textured Soy Protein Extruder Machine

Technical Specification :

High-Protein Output – Produces nutritious soy chunks with 50-70% protein content.

Meat-Like Texture – Advanced extrusion creates fibrous, chewy consistency.

Multi-Ingredient Compatible – Processes soy, pea, peanut protein, and blends.

Adjustable Shapes – Interchangeable dies for chunks, flakes, granules.

Energy Efficient – Optimized screw design reduces power consumption.

Continuous Operation – Stable performance for 24/7 production.

Easy Maintenance – Quick-disassembly design for cleaning and part replacement.

Compact Footprint – Space-saving for small/medium factories.

Feeding System – Precisely delivers raw materials into the extruder

Extrusion Barrel – High-temp, high-pressure cooking chamber with wear-resistant screws

Twin-Screw Assembly – Specialized screw configuration for protein texturization

Die Head – Interchangeable molds for various product shapes

Cutting Device – Adjustable rotary cutter for length control

Drying/Cooling Unit – Optional post-processing attachment

Output	Installed capacity

200-250kg/h	90kw
450-500kg/h	160kw
800-1000kg/h	230kw
