

**Product Name :**  
Soya Meat Machine

**Product Code :**  
EQMH-CHINA-MY3005014

**Description :**

Soya Meat Machine

**Technical Specification :**

Versatile Inputs – Compatible with defatted soy, pea protein, peanut meal, and more.

Meat-Like Texture – Advanced extrusion delivers a fibrous, chewy consistency ideal for meat analogs.

Multi-Format Output – Adjustable dies produce TVP in chunks, strips, flakes, or granules.

Wide Applications – Perfect for vegetarian snacks, meat alternatives, fast food, frozen meals, and ready-to-cook products.

**Textured Vegetable Protein (TVP) / Soya Meat Production Line**

This advanced processing line transforms defatted soybean meal, pea protein, peanut meal, and other plant-based ingredients into high-quality textured vegetable protein (TVP/TSP) products-including soya chunks, granules, and protein crumbs-through mixing, extrusion, cutting, and drying.

**product-1-1**

Screw: multi-functions for different snack applications with strong bearing.

Barrel: much longer using the life of excellent modular square barrels with high machining accuracy.

Internal Air Circulation: The dryer uses a cross-circulation air path design inside to drive hot air to penetrate drying materials and increase drying efficiency.

Control Panel: Control of switches, equipment parameters, and centralized control are all located on the control panel.
