FOOD EXTRUDER MACHINE

Lab Double Screw Extruder

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3006015	**Food Extruder Machine**	**China, exported worldwide**

Description

A laboratory double screw extruder for product development, recipe trials and small batch production, running the same process as a production machine at a fraction of the throughput.
Developing recipes on a production line is expensive in both material and lost output, and it ties up a machine that should be making saleable product. A lab machine lets formulations be proven before scaling, and the settings transfer. Contact us with your development requirements and we will advise on the configuration that will scale to your production equipment.

Technical specification

Lab twin screw extruder is used for universities, research institutes and large and medium-sized enterprises engaged in various extrusion, extruded maturation, extruded variability study omnipotent models. It has gone through four generations of improvements to adapt to cereals, potato starch, protein, chemicals, plastics, rubber and other raw materials are vastly different for a variety of experiments.
Powerful, easy to operate and simplely of parameters adjustment, test data accurate, easy maintenance.our lab extruder can make puff snack food , fish feed , artifical rice and so on.

Capacity	Main Power	Screw diament

6kw	30mm	
Capacity	Main Power	Size(L×W× H)
6kw	32mm	32MM

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
